

SANDVIK COROMANT – ADVANCE PLASTIC PRODUCTS INQUIRY

The Category Manager “Steel, Machined Components & Sputtering Targets” of Sandvik Coromant AB (www.sandvik.coromant.com/) responsible for purchasing high precision products that Sandvik sources from external suppliers is seeking for manufacturers within the following general information:

- shorter batches with high precision and fine tolerances. Suppliers need to be able to export to Germany as this is the country that needs to find an alternative to what they have today.
- Sandvik products are similar to gas dampers and that would require a very fine surface as they are also situated in a high wear environment which require special tooling steel.
- It would also be interesting to find a company that can do hard metal grinding.
- Some of supplied parts are very small.
- Interested suppliers will have to sign NDA so Sandvik Coromant can share some drawings to have a technical discussion about.

Interested suppliers, please send your interest to CzechTrade Office in Stockholm by e-mail to the address: tomas.rousek@czechtrade.cz

Selected companies will be contacted by CzechTrade for negotiations.
