We implement smart glasses and extended reality in the industry

We provide a wide range of hardware and software options but mostly we are a full-service partner to our customers in delivery, consulting and additional services, such as content development for smart glasses or 3D data visualization.

Consultation & analysis

Introducing hardware & software

Suitable customized solution

Customer solution implementation

Technical & user support

AYES

AYES complex solution for digitizing processes with AR/VR

The solution consists of 3 parts: hardware, software and professional services

HARDWARE - selection of suitable high-quality hardware for professional industrial use.

SOFTWARE – selection of best-fitting software for the use cases meeting the both user and IT requirements.

PROFESSIONAL SERVICES – training, support, service plans, …
