<b>Email Address</b>	usamaturfi@icloud.com
<b>Website</b>	-

**5. Description of Problem, Suggested Intervention and List of Items**

*Brief description of the current situation which is to be targeted by the earmarked donation, and list of required items covered by the donation.*

*The past two decades of instability with basic services. Although it is several years after the war now, the security situation is still not amiable and lot of the public resources are spent on improving security. Moreover, the COVID-19 pandemics is stripping Iraq of even more of its resources, especially in the healthcare sector, where the resources used on the fight against the COVID-19 pandemics are lacking elsewhere.*

*At the time of the 2003, the health system was weak, with non-functioning equipment, inadequate drug supplies, and fragile infrastructure. The destruction and looting of health facilities that followed the invasion resulted in heavy loss of*

equipment and pharmaceutical stocks. Quality of care continued to deteriorate and shortages were widespread. Major loss of health staff from tertiary hospitals had an effect on teaching of trainees and care of patients.

Iraq's health system is still struggling to recover from years of war, sanctions, loss of health workers, looting, and political interference.

Technical specification for **Delivery Room** package and items attached.

Birthing bed

Electrosurgical Unit

Ultrasound

Portable Ultrasound

### 6. Project Timeframe

Overview of the expected timeframe and related activities

4 months after signing the contract
